INSECT GUARD CONTROL SYSTEM

Benefits

- **Multi-faceted insect control for best elimination of insect pests**
 - A. **Automatic metered release into the air of safe insecticide for control of flying and crawling insects**
 - B. **Long lasting targeted surface spray to control crawling and landing insects**
 - C. **Aerosols for fast knockdown and kill of individual pests and for clearing areas**

Controls

- House Flies, Blow Flies, Fruit Flies, Mosquitoes, Midges, Moths, Beetles, Wasps, Spiders, Ants, Carpet Beetles, Cockroaches, Stored Product Insects and more.

A. INSECT GUARD AUTOMATIC

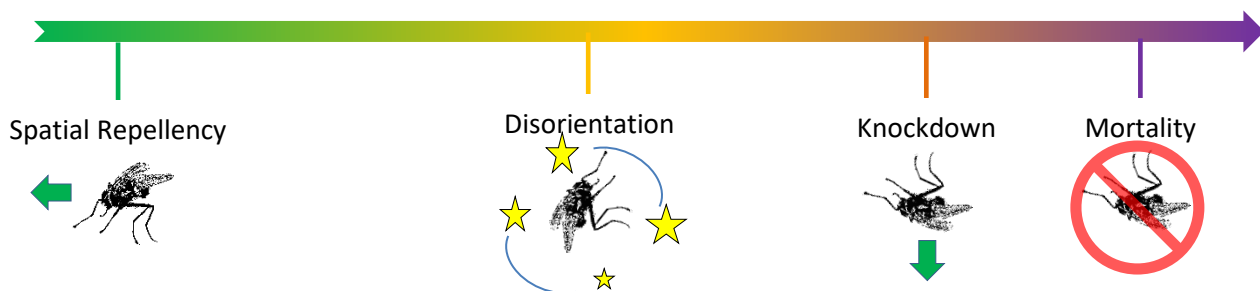

- **Options** - [Natural](#), [Odourless](#) and [Commercial strength](#)
- **Insect Repellency** – reduces insects entering area and encourages insects to leave
- **Insect Knockdown** – Quickly immobilises insects that remain in the area
- **Insect Mortality** – Insects die after immobilisation
- **Continuous Activity** – Long term control of flying and crawling insects
- **COMPATIBLE WITH AUTOMATIC DISPENSERS FOR:**
 - **INSECT GUARD**
 - **MORTEIN***
 - **EXPRA AUTOMATIC***

What's the difference?

INSECT GUARD Automatic, Natural, Odourless and Commercial, provide protection from annoying pest insects by repelling them, disorienting them, rapidly knocking them down and killing them.

Exposure

Directions

1. Ensure the switch on the dispenser unit is in the OFF position.
2. Remove cap/lid from the INSECT GUARD refill can.
3. Ensure you direct the dispenser away from your face at all times.
4. Place the refill can firmly into the dispenser unit, with the nozzle facing outwards.

5. Point dispenser away from you and switch to the ON position, selecting desired time interval (strength and day/night setting^).
- For mounting and programming, refer to your dispenser instructions.

B. INSECT GUARD SURFACE SPRAYS

- **Options** – Multi-Insect, Ants and Spiders aerosols plus water based Multi-Insect surface spray
- **Kills** – Kills crawling and landing insects quickly and easily
- **Easy to use** - Aerosol barrier spray
- **Targeted Use** - Easily gets into cracks and crevices where insects hide
- **Indoor and outdoor use**

Directions

1. SHAKE CAN WELL BEFORE USE.
2. Holding the can approximately 20-25 cm from the area to be treated. Spray all infested areas.
3. Spray around the house perimeter, inside and out, to kill existing insects and create a protective barrier against insects entering your home.
- Re-apply every 3 months or as necessary.

C. INSECT GUARD INSECT BOMB AND HAND-HELD AEROSOL

- **INSECT BOMB** – For complete clearance of insect and spider pests from a space
 - **Kills all insects** present at time of activation
 - **Quick knockdown** & easy to use
 - **Excellent** for hard to reach areas
 - Does not stain
 - Effective up to 150 m³ per bomb
- **HAND-HELD AEROSOL** – For targeted quick knockdown and kill of individual insects and/or in areas not covered by A and B.
 - For **directly targeting** flying and crawling insects indoors
 - **Insect Knockdown** – Quickly immobilises
 - **Insect Mortality** – Insects die after immobilisation
 - **Non-Persistent** – Active ingredients breakdown and do not leave residue build up

BEST RESULTS

- In combination, parts A, B and C, will give the best results in controlling flying and crawling insects.
- Ensure that the space volume is calculated, and the appropriate products and settings are used. Each Insect Guard Automatic dispenser unit protects spaces up to 50 m³ (i.e. 2 dispensers for spaces of 100 m³ or 35 m²)
- Fastest results are achieved in cool conditions such as night time.
- Find and remove or treat fly breeding sites; e.g. rotting compost, animal manure, food, fermenting fruit, spilled drinks, etc.
