

**KIWICARE®**

# Technical Sheet

## NO Bugs Super

Long Lasting Control of Insect and Spider Pests

[www.kiwicare.co.nz](http://www.kiwicare.co.nz)

# NO Bugs Super

## Benefits and Features

- Professional strength, long lasting insect control.
- Kills 99% common insect pests.
- Micronised active for better coverage and pest contact.
- One spray protects surfaces for up to 4 months outdoors and 6 months indoors.
- Sprayed surfaces are safe to children and pets.
- For use indoors and outdoors.

## Controls

- Crawling insects  
Including:
  - [Ants](#)
  - [Cockroaches](#)
  - [Carpet Beetle](#)
  - [Silverfish](#)
  - [Maggots](#)
  - [Booklice](#)
  - [Stored Product Insects](#)
- Flying insects  
Including:
  - [House Flies](#)
  - [Cluster Flies](#)
  - [Moths](#)
  - [Mosquitoes](#)
  - [Wasps](#)
- Spiders  
Including:
  - [Whitetail Spiders](#)
  - [House Spiders](#)

## Directions

### For spiders, crawling and flying insects

- 1) Concentrate - Dilute 20 ml per 1 litre of water.  
Ready to Use – Press and twist spray nozzle to SPRAY.
- 2) Spray surfaces where insect and spiders pests land or crawl.
- 3) Apply to the point of run off but do not let runs develop i.e. 2 light sprays is better than one heavy.

## For Best Results

- If the surfaces to be treated are dirty or greasy, clean them with mild detergent and leave to dry thoroughly.
- For exterior spraying choose a still dry day when rain is not imminent.
- Using a fine spray and a steady motion, spray the surfaces to give an even coverage. Do not over spray; the spray should not run down surfaces. If the spray beads on the surface let it dry and then give a second spray. Two light sprays is better than one heavy spray.
- When spraying around windows avoid over spraying on the glass. It is easier to clean spray off windows before it has dried.

## Use as Part of the Kiwicare 1-2-3 Bug Control Programme

1. **Identify** – Identify the pest using the online Kiwicare [Problem Solver](#). Look for where the insect, spider or ‘bug’ may originate e.g. breeding site, such as spilled food, compost heap, blocked drain, chip bark, stagnant water, etc. Get rid of any breeding sites identified (if possible).
2. **Protect** – Spray [NO Bugs Super](#) on breeding sites, where bugs are seen contacting surfaces and in a barrier ring around and inside buildings; walls, eaves, vents, under cupboards, edges of carpets, behind appliances, etc.
3. **Eradicate** – Use NO Bugs Fumigators in internal spaces to quickly and safely flush bugs from hiding places and eradicate them. Use [NO Bugs Super Bug Bomb](#) aerosols in open spaces such as internal rooms. Use [NO Bugs Super Fumigator](#) (water activated) in large spaces and spaces with low head clearance such as sub-floors and roof voids.

For more information on identification and control of specific pests go to the Kiwicare website - [kiwicare.co.nz](http://kiwicare.co.nz)

### Active Ingredients

Concentrate: 15 g/L Deltamethrin in the form of a suspension concentrate.

Ready to Use: 0.6 g/L Deltamethrin in the form of a ready to use liquid.

### Registration

NZFSA Approved Insecticide Maintenance Compound (non-dairy) Type B

Concentrate: HSNO Approval Code: HSR100764.

Ready to Use: HSNO Approval Code: HSR100765.

### Caution

Keep out of the reach of children.

### Available As

- Concentrate: 100 ml, 250 ml, 500 ml, 1 L\* and 5 L\*
- Ready to Use: 680 ml, 1 L, 2 L, 4L Pump’n’Spray

\*Commercial sizes Deltamethrin 15SC

### Complementary Products

- [NO Spiders Total Solution Spray](#) (aka Permethrin 100EC)
- [NO Bugs Super Fumigator](#)
- [NO Bugs Super Bug Bomb](#)
