Gro-Sure™ Houseplant Potting Mix  
For optimum plant health and greener leaves

[www.kiwicare.co.nz](http://www.kiwicare.co.nz)

# Background

[Gro-Sure Houseplant Potting Mix](#) is a specially blended premium mix for potting most indoor plants. This open, free draining mix promotes healthier growth and greener leaves for an outstanding indoor garden!

## Benefits and Features

- Contains premium fertiliser N:P:K 17:4.8:8.3 (and trace elements) which slowly releases nutrients over 3-4 months.
- Highest quality ingredients, blended and tested to ensure excellent drainage and oxygen availability around plant roots.
- Contains [Seramis](#)® a natural terracotta granule with excellent water regulation properties.

## Available As

- 6 Litre Bag.

## Application

### Directions

Houseplants require re-potting every 1-2 years depending on the variety. Plants will eventually become root bound and roots may protrude through the drainage holes in the bottom of the pot.

1. First water the plant well and allow to drain.
  2. Choose a pot larger than the old one both in diameter and in depth, ensuring it has adequate drainage holes.
  3. Place a layer of potting mix in the base of the new pot and gently remove the plant from its old pot holding it carefully close to the base.
  4. Place the plant on top of the layer of potting mix in the new pot, ensuring the root ball is slightly below the rim of the new pot.
  5. Fill in with potting mix around the root ball, gently tapping the pot to ensure all gaps are filled.
  6. Water well and leave to drain.
- Place plants in bright positions but avoid direct sunlight
  - Avoid placing in areas with temperature fluctuations i.e. on window ledges or under heat pumps
  - Regularly mist foliage with Gro-Sure Houseplant Mist 'n' Feed to ensure leaves are kept healthy, and clean leaves with a damp cloth as required.

# CPR for Your Cacti and Succulent Houseplants

How are your houseplants? Do they need Care, Protection and Revitalising? Do they need CPR?

The Kiwicare [Gro-Sure Houseplant range](#) has all you need to give your cacti and succulents the CPR they need.

## 1. Care

- a. Use [Gro-Sure Watering Indicators](#) to ensure you water your houseplants when they need it.
- b. Use [Gro-Sure Cacti and Succulent Pump'n'Feed](#) and [Droplet Feeders](#) to make sure your houseplants have the nutrients they need for healthy growth.
- c. Use [Gro-Sure Houseplant Mist'n'Feed](#) to raise humidity around foliage for healthier green leaves.

## 2. Protect

- a. Use [Gro-Sure Houseplant Insect Control Spray](#) to protect your houseplant from insect pests.

## 3. Revitalise

- a. Re-pot your houseplant in [Gro-Sure Houseplant Potting Mix](#) to prevent root restriction, provide good drainage and aeration, and provide root delivered nutrients.
- b. Then go back to 1.

This CPR cycle will ensure your houseplants continue to give you pleasure for years.

Also, in the [Gro-Sure Houseplant Range](#) are Orchid specific options for feeding and misting your plants.
