INSECT GUARD

INSECT GUARD AUTOMATIC CONTROL SYSTEM: COMMERCIAL STRENGTH

TECHNICAL SHEET – AUGUST 2018

INSECT GUARD COMMERCIAL STRENGTH

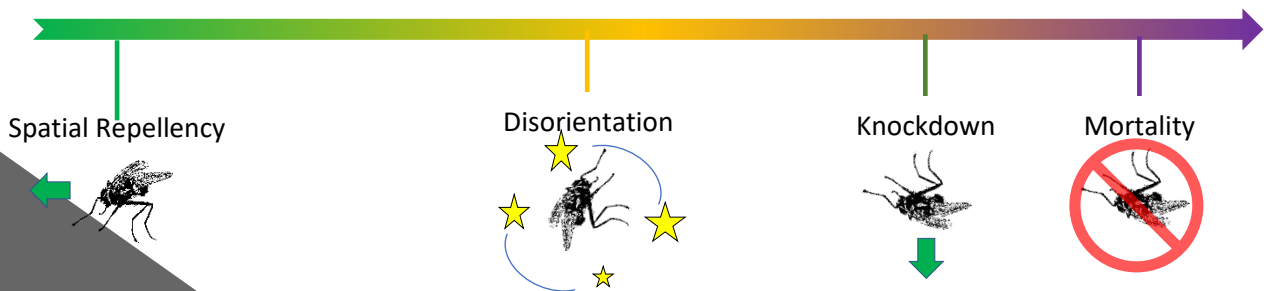

Benefits

- Metered release of volatile pyrethroid insecticide for control of flying and crawling insects indoors
- **Insect Repellency** – reduces insects entering area and encourages insects to leave
- **Insect Knockdown** – Quickly immobilises insects that remain in the area
- **Insect Mortality** – Insects die after immobilisation
- **Non-Persistent** – Active ingredients breakdown and do not leave residue build up
- For spaces up to 50 m³
- **COMPATIBLE WITH AUTOMATIC DISPENSERS FOR:**
 - INSECT GUARD
 - EXPRA ULTRA*
 - EXPRA GENIUS*
 - ROBOCAN*
 - RAID*

What's the difference?

INSECT GUARD Commercial Strength provides continuous protection from annoying pest insects by repelling them, disorienting them, rapidly knocking them down and killing them.

Exposure

Controls

- House Flies, Blow Flies, Fruit Flies, Fleas, Silverfish, Mosquitoes, Midges, Moths, Spiders, Cockroaches, Beetles, Ants and more.

SPIDERS

SILVERFISH

FLEAS

ANTS

FLIES

MOSQUITOES

COCKROACHES

MOTHS

Directions

1. Ensure the switch on the dispenser unit is in the OFF position.
2. Remove cap/lid from the INSECT GUARD refill can.
3. Ensure you direct the dispenser away from your face at all times.
4. Screw the refill can into the dispenser, ensuring it's sealed firmly, but not overtightened.
5. Point dispenser away from you and switch to the ON position, selecting desired time interval.

For mounting and programming, refer to your dispenser instructions. (We recommend not to be used in rooms smaller than 16m³ (3m x 2.2m).

Caution

- Avoid installation over furniture, polished surfaces, food preparation areas or appliances as the contents may stain or damage these surfaces. Do not locate near naked flames.
- Surfaces may become slippery when sprayed; clean surfaces with warm, soapy water and dry thoroughly.
- Not for use outdoors.

Active Ingredients

- 3.5 g/kg Permethrin and 4.0 g/kg Tetramethrin.

Available As

- 305 g Dispenser and Refill
- 305 g Refill

FAQs

Q. What are Permethrin and Tetramethrin?

A. Permethrin and Tetramethrin are safe pyrethroid insecticides that, because they are volatile, readily transition to the vapour phase stay in the air longer and penetrate the treatment space. They are easily contacted and 'breathed in' by the pest insects giving effective rapid control.

Q. How long does INSECT GUARD Commercial Strength take to work?

A. Typically, INSECT GUARD Commercial Strength will be repellent immediately, disorientation of flying insects will occur within minutes, knockdown will occur after 10-30 minutes and insect death 30-60 minutes after exposure. However, expect full effectiveness to be achieved 24 hours from first installation.

Q. Can INSECT GUARD Commercial Strength be left on when going on holiday?

A. Yes. However, if you are leaving for more than a week we recommend turning the dispenser off.
