INSECT GUARD

INSECT GUARD SPIDER CONTROL SURFACE SPRAY

TECHNICAL SHEET – AUGUST 2018

INSECT GUARD SPIDER CONTROL SURFACE SPRAY

Benefits

- Kill spiders quickly and easily
- Easy to use aerosol barrier spray
- Easily gets into cracks and crevices where spiders hide
- Stops unsightly spider webbing
- Indoor and outdoor use

SPIDERS

What's the difference?

INSECT GUARD Spider Control Surface Spray provides protection from spiders and spider webs by repelling them, rapidly knocking them down and killing them.

Controls

- House spiders, Whitetail spiders' Daddy long legs spiders' Redback spiders, Slater spiders, Orbweb spiders,and others.

Directions

1. SHAKE CAN WELL BEFORE USE.
 2. Holding the can approximately 20-25 cm from the area to be treated. Spray all infested areas, webs, Spider hiding places and where Spiders have been active.
 3. Spray around the house perimeter, inside and out, to create a protective barrier against Spiders entering your home.
 4. Kiwicare is aware that spiders are not insects; Insect Guard is the brand name under which Spider Control Surface Spray sits.
- Re-apply every 3 months or as necessary.

Caution

- Avoid spraying directly onto furnishings, fabrics, wallpaper or food handling areas.

Active Ingredients

- 2.0 g/kg Tetramethrin and 2.0 g/kg Cyphenothrin.

Available As

- 300 g aerosol

Complimentary Products

- Insect Guard Automatic Range
- Insect Guard Insect Control Bomb

FAQs

- Q. What are Tetramethrin and Cyphenothrin?
- A. Tetramethrin and Cyphenothrin are safe pyrethroid insecticides that, because they are stable, will give long lasting protection on the surfaces ants will contact.
- Q. How long does INSECT GUARD Spider Control Surface Spray take to work?
- A. Typically, INSECT GUARD Spider Control Surface Spray will be repellent immediately, knockdown will occur after 10-30 minutes after direct spraying and ant death ~60 minutes after exposure to treated surfaces. However, expect full effectiveness to be achieved 24 hours from first treatment.
