INSECT GUARD

INSECT GUARD MULTI- INSECT CONTROL SURFACE SPRAY RTU

TECHNICAL SHEET – AUGUST 2018

INSECT GUARD MULTI INSECT SURFACE SPRAY RTU

Benefits

- Long lasting protection from flying and crawling insect pests
- Kills insects after contact
- Provide protective barrier for your house
- Indoor and outdoor use
- Easy to use 2 litre with hose and remote trigger

Controls

- House Flies, Blow Flies, Fruit Flies, Fleas, Silverfish, Mosquitoes, Midges, Moths, Spiders, Cockroaches, Beetles, Ants and more.

Directions

- Holding the trigger approximately 20-25 cm from the area to be treated. Spray surfaces insect pests are seen crawling over except those used for food preparation. See tips below for specific pests. Spray around the house perimeter, inside and out, to create a protective barrier against insects entering your home.
- **Ants** – Apply to places Ants are seen and in a band around the exterior base of walls.
- **Flies** – Apply to surfaces flying insects are seen landing including exterior sunny walls.
- **Cockroaches and Silverfish** – spray surfaces where cockroaches and silverfish have been seen and cracks, crevices and dark places they hide during the day.
- **Spiders** - spray spider hiding places and webs.
- **Moths**, including clothes moth and pantry moth - remove clothes/food from cupboards/drawers clean, spray, let dry and return goods.
- **Fleas** - spray edges of carpets and anywhere else dust tends to collect.
- **Mosquitoes** - apply to mosquito resting surfaces such as fences and hedges.

Caution

- Avoid spraying directly onto delicate furnishings, fabrics, wallpaper or food handling areas.
- Re-apply every 2-3 months or as necessary.

Active Ingredients

- 3.5 g/L Permethrin in the form of a ready to use liquid.

Available As

- 2 Litre with hose and remote trigger

Use in Conjunction With

- INSECT GUARD Odourless Automatic Aerosol
- INSECT GUARD Natural Automatic Aerosol
- INSECT GUARD Commercial Automatic Aerosol
