

# Kiwicare Lawn Maintenance Calendar

Month	Fertiliser	Water	Weed Control	Pest Control	Disease Control	Conditioning	Mowing	Sowing	Comments
January	Apply <a href="#">LawnPro 7 Day Green</a> fertiliser and sweetener.	Water thoroughly once or twice a week in the morning.		Treat with <a href="#">LawnPro Protect</a> if there is grass grub or porina damage evident.			Mow weekly and remove clippings.		Fine browntop/fescue lawns mow at 20 mm. Ryegrass lawns mow at 30-35 mm.
February		Water thoroughly once or twice a week in the morning.		Treat with <a href="#">LawnPro Protect</a> if your lawn is prone to crickets.			Mow weekly and remove clippings.		Fine browntop/fescue lawns mow at 20 mm. Ryegrass lawns mow at 30-35 mm.
March		Water thoroughly once or twice a week in the morning.	When your lawn and weeds are growing apply <a href="#">LawnPro Turfclean</a> , <a href="#">Turfclean &amp; Green</a> , <a href="#">Prickle and Hydrocotyle</a> or <a href="#">LawnPro All-in-1</a> .	Treat with <a href="#">LawnPro Protect</a> if there is grass grub or porina damage evident or if your home is prone to cluster flies.	Apply <a href="#">LawnPro Fungus Control</a> to lawns susceptible to disease if weather conditions have kept lawns wet.	Topdress (spread mix of soil/media and sand on lawn) and over-seed. Apply <a href="#">LawnPro D-Thatch</a> to balance <a href="#">thatch</a> levels.	Mow weekly and remove clippings.	Time to sow new lawns and over-sow bare patches with <a href="#">LawnPro Lawn Thickener</a> or <a href="#">LawnPro Smart Seed</a> .	Do Not mow for 2 weeks after topdressing and over-seeding.
April	Apply <a href="#">LawnPro 7 Day Green</a> fertiliser and sweetener.	Water thoroughly as necessary.		Treat with <a href="#">LawnPro Protect</a> if there is grass grub or porina damage evident.		Fertiliser and sweetener applied now will keep your lawn strong and healthy during the cool winter months. Protecting it for pests and disease.	Mow weekly and remove clippings.	Time to over-sow bare patches with <a href="#">LawnPro Lawn Thickener</a> or <a href="#">LawnPro Smart Seed</a> .	
May		Water thoroughly as necessary.					Mow only if required.		Take a rest and enjoy your lawn.
June		Water thoroughly as necessary.					Mow only if required.		Take a rest and enjoy your lawn.
July							Mow only if required.		Take a rest and enjoy your lawn.
August							Mow only if required.		Take a rest and enjoy your lawn.
September	Apply <a href="#">LawnPro 7 Day Green</a> fertiliser and sweetener.		When lawn weeds are growing apply <a href="#">LawnPro Turfclean</a> . For areas of moss apply <a href="#">LawnPro Mossclear</a> . Or for both weeds and moss apply <a href="#">LawnPro All-in-1</a> . Then scarify.			Topdress (spread mix of soil/media and sand on lawn) and over-seed. Apply <a href="#">LawnPro D-Thatch</a> to balance <a href="#">thatch</a> levels.	Mow weekly and remove clippings.		Fine browntop/fescue lawns mow at 20 mm. Ryegrass lawns mow at 30-35 mm.
October		Water thoroughly as necessary.	If your lawn is prone to Onehunga prickle weed apply <a href="#">LawnPro Prickle and Hydrocotyle</a> now before the weed flowers and produces its prickly seeds.		Apply <a href="#">LawnPro Fungus Control</a> to lawns susceptible to disease if weather conditions have kept lawns wet.		Mow weekly and remove clippings.	Time to sow new lawns and over-sow bare patches with <a href="#">LawnPro Lawn Thickener</a> or <a href="#">LawnPro Smart Seed</a> .	
November	Apply <a href="#">LawnPro 7 Day Green</a> fertiliser and sweetener.	Water thoroughly once or twice a week in the morning.	Apply <a href="#">LawnPro Turfclean</a> , <a href="#">Turfclean &amp; Green</a> or <a href="#">Prickle and Hydrocotyle</a> to control weeds.				Mow weekly and remove clippings.	Time to over-sow bare patches with <a href="#">LawnPro Lawn Thickener</a> or <a href="#">LawnPro Smart Seed</a> .	It is good weed control practice to use <a href="#">LawnPro Turfclean</a> as routine and alternate it with <a href="#">LawnPro Prickle and Hydrocotyle</a> every 3 <sup>rd</sup> of 4 <sup>th</sup> treatment.
December		Water thoroughly once or twice a week in the morning.					Mow weekly and remove clippings.		If you have prepared your lawn you can sit back and enjoy it over the holiday period.
