

KIWICARE®

Gro-Sure™ Easy Flowers All in One - Seeds, Feed and Mulch

Add months of vibrant, bright colour to your garden the easy way with Gro-Sure™ Easy Flowers!

www.kiwicare.co.nz

Background

Gro-Sure™ Easy Flowers all in one mixes are all you need to bring splashes of colour to your garden. Choose from the [Bright Colour Mix](#), [Pastel Colour Mix](#) or [Wildflower Mix](#), each with its unique combination of flower seeds, plant food and mulch.

There are two sizes; the 800 g packs contain flowers of a variety of heights from 10 cm up to 1.2 metres, suitable for flowerbeds and borders.

The 300 g packs contain lower growing flowers from 10 cm up to 50 cm, suitable for containers, pots and hanging baskets.

New Products

Available As

- 800 g packs (for flowerbeds and borders – 6 m²)
- 300 g packs (for containers, pots, hanging baskets – 2 m²)

Ingredients

Flower seed mix, flower starter feed and mulch.

Application

Directions

Shake the pack well before use in a tumbling motion, by rotating the pouch and shaking it at the same time for at least three rotations.

The 800 g packs contain enough for 3 large flower beds of 2 m² each; perfect for covering large areas or filling in gaps. To prepare the soil, remove visible weeds and rake the surface, then scatter the contents of this pack evenly over the area. Rake lightly once more to ensure the contents are well mixed with the soil.

The 300 g packs contain enough to plant up to 2 m² each; perfect for containers, pots, hanging baskets. To prepare the soil or compost, rake the surface, then scatter the contents of this pack evenly over the soil/compost. Rake lightly once more to ensure the contents are well mixed with the soil.

Water regularly, especially in dry spells, gently at first to avoid washing away the seeds. For best results keep the mulch wet — the mulch will turn a dark green colour and expand in size when it is wet enough.

For Best Results

- To prepare the soil — remove any weeds from the area ensuring there are no large clumps of soil or stones, and rake the surface so that it is smooth.
- If the soil is low in nutrients, improve by adding organic matter and/or a general purpose fertiliser.
- Water regularly — it is important to keep the mulch wet at all times for best results.
- Protect young plants from pests particularly slugs.

Caution

- Store in a cool, dry place away from children, pets and foodstuffs.
- Use contents within season of purchase.
- Wash hands after use.
- Contents may settle during transit, shake well before application.
