LawnPro Protect

Granules to control insects and grubs in lawns and soils.

www.kiwicare.co.nz

LawnPro Protect Granules

LawnPro Protect Granules provide long lasting control of insect grubs, caterpillars and insects in lawns:

Lambda-Cyhalothrin

- Contact insecticide – long lasting
- The active ingredient washes off the granules and stays on surface and in the upper layer of soil.
- Controls insect grubs when they move to the surface to feed.
- Prevents soil insect pests by forming a protective barrier at the soil surface. Controls adult stages during egg laying and pupal emergence.

Benefits and Features

- Curative - Lawns where porina or other soil insect damage is seen. Around the exterior of buildings to provide a barrier on the surface and deep in soil to insects such as ants that would move indoors via the surface or tunnelling.
- Preventative – all lawn areas to be protected from grass grub and other insect damage.
- Improves grass condition.

Controls

Grass grub, porina caterpillar, slaters, earwigs, wireworm, cluster fly larvae, ants, cockroaches and more...

Available As

- 350 g, 600 g, 3 kg.

Active Ingredients

0.4 g/kg Lambda-Cyhalothrin in the form of a granule

Application

Directions

- 1) Sprinkle evenly over area to be protected.
- 2) Water in for a minimum of 1 hour by gentle irrigation or moderate to heavy rain.

Rate of Application for Best Results

Pest	For Best Control
Grass Grub	Apply between September and March. Apply 100g per 15 m ²
Porina Caterpillar	Apply when damage and holes are seen in lawn. Apply 100g per 30 m ²
Slaters, Earwigs	Use on garden beds and around buildings. Apply 100g per 10m ²
Wireworm	Sprinkle on affected soil. Apply 100g per 10m ²
Cluster Fly Larvae	Apply between November-March within 200 m of previously affected buildings. Apply 100g per 30m ²
Ants and Cockroaches (as barrier)	Apply a 50 cm band around buildings and around ant nest sites. 100g per 20 m ²

Additional Uses

Control of Ants and Cockroaches

LawnPro Protect can be used in the soil around buildings to form a barrier to ants and cockroaches. It can also be used around plants where ants would 'farm' aphids, scale and other sap sucking insects.

Caution

- To protect beneficial pollinating insects such as bees do not apply to lawns or turf containing flowers and do not apply to soils around plants in flower or likely to flower soon afterwards.
- Keep domestic fowls off treated areas for 6 days.

Regulations

- LawnPro Protect is not registered with ACVM for use on crops or animal feedstuffs.
- Approved pursuant to HSNO Act 1996. **HSR101291**
- See www.epa.govt.nz for approval conditions.
