

KIWICARE®

Technical Sheet

NO Ants Ant Sand

Kills Ant Nests

NO Ants Ant Sand

Benefits and Features

- Extremely effective control of ants before they enter your home.
- Fast acting and long lasting.
- Safe for use around soil and plants.
- Non-repellent; does not cause ants to spread to other areas.
- Odourless and biodegradable.
- For outdoor use only.
- Use as step 3 of the Kiwicare [1-2-3 Ant Control Programme](#).

NO ANTS - ANT SAND

1 2 3 DESTROY

1. BAIT: Place small drops 30 cm apart where ants have been seen.

2. BARRIER: After 1-2 weeks follow up bait with Kiwicare **NO Ants Barrier Spray** applied as a ring around the affected building/s.

3. DESTROY: If nest sites are identified outside under pavers, paths, driveways or rocks destroy the nest sites with Kiwicare **NO Ants Ant Sand**.

Controls

- Argentine ants
- Darwin ants
- White-footed ants
- Black garden ants
- Black hose ants

Directions

For all ants

1. Sprinkle [NO Ants Ant Sand](#) evenly over the area to be treated such as lawns, flowerbeds, pathways and in cracks between paving stones.
2. Where possible apply directly to areas such as ant trails and nests*, dispersing product evenly.
3. DO NOT heap sand granules.

**It is recommended that NO Ants Gel Bait or NO Ants Liquid Bait are used for at least one week prior to applying sprays to ant nests to prevent causing ant nest budding where ants leave the nest and disperse to form new nests. Ant Sand will not cause budding.*

For Best Results

- Place many bait points inside and outside to increase the bait taken back to the nest.
- Follow up bait treatment with the use of Kiwicare [NO Ants Barrier Spray](#) and Kiwicare [NO Ants Ant Sand](#).
- Deny ants access to other food; wipe up spills and keep food in sealed containers.
- See kiwicare.co.nz for more information on ant control.

Active Ingredients

2 g/kg Bifenthrin as a granule. Registration

EPA Approval Number: HSR000047

Caution

Keep out of the reach of children. Suspected of damaging fertility or the unborn child. May cause damage to organs through repeated exposure.
