PLANThealth Root Protect Alette

Benefits

- Controls root rotting disease and dieback.
- Controls downy mildew.
- Ideal for use on fruit trees, ornamentals, shrubs and roses.
- Penetrates rapidly and has a long residual action.
- Absorbed through both foliage and roots.
- Use during transplanting to prevent shock.
- Boosts the plant's own defences.

Directions

Curative:

1. Dilute 1 sachet (5 g) in 1 L of clean water.
2. Downy mildew - apply to foliage to point of run off.
3. Root rot diseases - apply to foliage and as a root drench.
4. Apply as foliar spray every 28 days to plants showing symptoms of disease.

Prevention and transplanting:

1. Dilute 1 sachet (5 g) in 2 L of clean water.
2. Apply as foliar spray every 28 days in conditions when plants are likely to get disease i.e. moist warm weather.

Tips

- Can also be used before transplanting by gently soaking roots and soil in the solution.
- Prune out dead material. Clean all equipment used for cutting between each plant and again after use, to prevent spreading disease.
- Rake out leaf litter from below plants as this may harbour disease.
- Make a smooth paste using the powder and a small amount of water before mixing to the final dilution.
- Ensure product is thoroughly mixed before applying.
- Use all the mixture within 24 hours.

Controls

- [Phytophthora](#), [Pythium](#) (root rotting diseases and dieback), [Buxus Blight](#), and [Downy Mildew](#).

Available As

- 5 x 5 g powder concentrate (makes 5 L)

Active Ingredients

- Contains - 800 g/kg Fosetyl-aluminium in the form of a water dispersible granule.

Caution

- To protect beneficial pollinating insects such as bees do not apply onto plants likely to be visited by bees or in an area where bees are foraging.
- It is an offence to use this product on animals.
- Not for use on fruit or vegetables.

Regulations

- HSNO Approval code: HSR000483. See www.epa.govt.nz for approval conditions.
